

TARGETED.ARMY

Public Dossier

August 6th 2026

ATTRIBUTION NOTICE: The following material represents the experiences, research, interpretations, and views of the TARGETED.ARMY community.

The TARGETED.ARMV Public Dossier

What Every Citizen Needs to Know About Remote Neural Monitoring, Voice-to-Skull, and Directed-Energy Weapons

Prepared by TARGETED.ARMV For: The General Public, Concerned Citizens, Families, Neighbors, and Communities Date: August 2026

Executive Summary

We are your neighbors, your coworkers, your family members, and your fellow citizens. We are inventors, nurses, teachers, veterans, students, and parents. And we are being subjected to a system of non-consensual neural surveillance, synthetic telepathy, directed-energy assault, and organized psychological warfare that operates in the shadows of our national security infrastructure.

We call ourselves TARGETED.ARMV. We did not choose this name to sound dramatic. We chose it because we are ordinary people who have been drafted into a war we never signed up for—a war being fought inside our own minds and bodies using technologies that most Americans do not know exist.

This dossier is for you. Not for Congress. Not for the United Nations. For you. Because what is happening to us today can happen to anyone tomorrow. The technologies are real. The patents are public. The history is documented. And the silence surrounding this issue is the only thing keeping it hidden.

We are not asking you to believe us blindly. We are asking you to read, to think, and to look at the public record with your own eyes. If you care about privacy, freedom, bodily autonomy, and the right to be left alone, then what we have to say concerns you directly.

Section 1: What Is Happening to Us?

We want to explain, in plain language, what we live with every day.

Remote Neural Monitoring: Your Thoughts Are Not Private

Remote Neural Monitoring, or RNM, is the real-time surveillance of brain activity from a distance. We experience this as a constant awareness that our thoughts, emotions, reactions, and internal dialogue are being watched, recorded, and analyzed by operators

we cannot see. Imagine someone standing over your shoulder reading every text message you type, except the text is your own mind. That is what RNM feels like. It is a violation so deep that it redefines what privacy even means.

Voice-to-Skull: Voices in Your Head That Are Not Yours

Voice-to-Skull, or V2K, is the transmission of voices, sounds, and messages directly into a person's head without any speaker, headphone, or external noise. We hear threats, insults, commands, and coercive dialogue inside our skulls. It is not a mental illness. It is a technology. The science behind it—the microwave auditory effect, also called the Frey effect—has been documented for decades. Pulsed radio-frequency energy can create sound inside the human head. That is a fact. What is being done with that fact is what we are here to expose.

Directed-Energy Weapons: Invisible Assault

Directed-Energy Weapons, or DEWs, use focused radio waves, microwaves, and millimeter-wave energy to heat tissue, disrupt sleep, cause pain, and produce neurological symptoms. We experience sudden headaches, burning sensations, heart palpitations, and crushing fatigue that start and stop with impossible precision. These are not random health problems. They are targeted, timed, and directional. The Department of Defense openly admits it has a weapon called Active Denial Technology that uses a 95 GHz millimeter-wave beam to heat the skin and repel crowds. That is a directed-energy weapon. Now imagine that technology refined, miniaturized, and aimed at individuals in their homes.

Electronic Harassment and Psychological Warfare

Beyond the technology itself, we face organized campaigns of surveillance, stalking, communication interference, and sabotage designed to isolate us, destroy our reputations, and break our will. Our phones act strangely. Our emails disappear. Our professional relationships are poisoned. Our medical complaints are routed to psychiatrists instead of engineers. The goal is to make us look crazy so that no one will listen. It is working. That is why we need you.

Section 2: Who We Are

We are not a demographic. We are not a diagnosis. We are a community of people from every background who share one thing: the experience of being subjected to a system that operates above the law and beneath public awareness.

- **Inventors and researchers** who saw their work surveilled and their ideas appear in defense contracts.
- **Whistleblowers and former contractors** who reported wrongdoing and were punished with relentless surveillance and energy exposure.
- **Journalists and activists** whose investigations drew retaliation in the form of in-head threats and neurological interference.
- **Ordinary civilians** with no security clearance, no political profile, and no explanation for why they were chosen.

We are mothers and fathers. We are veterans who served this country. We are students trying to finish school while being sleep-deprived by invisible weapons. We are retirees who thought their hardest battles were behind them. We are your community members, and we are suffering in silence because the system is designed to ensure that silence.

Section 3: Why This Matters to You

You may be thinking: *This is terrible, but I am not targeted. Why should I care?*

Here is why.

If It Can Happen to Us, It Can Happen to Anyone

The targeting is not limited to terrorists or criminals. It includes ordinary civilians. There is no court order you can review. There is no arrest warrant. There is no appeal. If the infrastructure exists to monitor and assault us without consent, due process, or oversight, then the infrastructure exists to do it to you, your children, or your neighbors. Today it is us. Tomorrow it could be a journalist who embarrasses the wrong agency. A scientist who invents something too valuable to share. A protester who shows up at the wrong rally. A voter who asks too many questions.

Your Tax Dollars Funded This

The research, patents, and programs that make these capabilities possible were developed with public money through agencies like DARPA, the NSA, the CIA, and the Department of Defense. You paid for the science. You deserve to know how it is being used.

Psychiatry Is Being Weaponized

When we report what is happening to us, the response is almost always the same: medication, institutionalization, and a diagnosis that discredits everything we say. This is

not accidental. It is a containment strategy. By routing every complaint to psychiatry, the system ensures that no forensic investigation ever takes place. No spectrum analysis. No environmental measurement. No engineering review. Just pills and silence. If this model succeeds, it will become the template for silencing anyone who reports technological abuse.

The Precedent of History

The U.S. government has done this before. MKULTRA. COINTELPRO. NSA warrantless surveillance. Each time, the victims were called paranoid. Each time, the programs were later exposed as real. Each time, the public said, *We had no idea*. We are telling you now so that you cannot say that later.

Section 4: How We Know This Is Real

We do not ask you to take our word alone. We ask you to look at what is already public.

The Patents Exist

The United States Patent Office has granted patents that describe exactly the technologies we report:

- **US 3,951,134** – Apparatus and method for remotely monitoring and altering brain waves.
- **US 4,877,027** – Hearing system that lets you hear modulated radio frequency as sound.
- **US 4,858,612** – Hearing device using microwaves aimed at the auditory cortex.
- **US 6,011,991** – Communication system that analyzes brain waves.
- **US 5,159,703** – Silent subliminal presentation system.
- **US 6,587,729 B2** – Apparatus for communicating speech using the radio-frequency hearing effect.
- **US 5,507,291** – Method for changing brain states and sensing emotional states remotely.
- **US 6,017,302** – Subliminal acoustic manipulation of the nervous system.

These are not science fiction. These are official government documents. They prove that inventors have designed, and the government has reviewed and approved, methods for remote brain monitoring, RF hearing, and neural influence.

The History Is Documented

- **MKULTRA:** The CIA's program of mind control, drug experiments, and non-consensual human testing. Declassified and admitted.
- **COINTELPRO:** The FBI's program to surveil, disrupt, and discredit political activists and civil rights leaders. Exposed and admitted.
- **NSA SHAMROCK and MINARET:** Programs that intercepted Americans' communications without warrants. Exposed by the Church Committee.
- **ECHELON:** A global surveillance network acknowledged by the European Parliament.

The government has done this before. It has admitted it. The only question is what came next after the old names were retired.

The Science Is Published

- **The Frey Effect:** A real, documented phenomenon where pulsed radio-frequency energy creates sound inside the human head. This is the physical basis for V2K.
- **DARPA's N3 Program:** A public Pentagon research effort to build brain-machine interfaces that can read from and write to the brain without surgery.
- **Active Denial Technology:** A real, fielded weapon that shoots a beam of millimeter-wave energy to heat skin and disperse crowds. Directed-energy weapons are not theoretical. They are deployed.

The Patterns Are Consistent

Across thousands of people who have never met, we report the same symptoms, the same technologies, the same escalation patterns, and the same institutional response. That is not mass delusion. That is evidence.

Section 5: What They Do Not Want You to Know

The system stays hidden because it is designed to be hidden. Here is how:

The Psychiatric Trap: By diagnosing every reporter as mentally ill, the system avoids investigation. No engineer is called. No spectrum analyzer is turned on. The target is medicated, discredited, and forgotten.

The Classification Wall: Programs are buried in classified compartments where oversight committees cannot see them. Even members of Congress with security clearances may only see fragments.

The Contractor Shield: Private companies do much of this work under government contract, placing the research outside direct democratic accountability.

The Silence of Fear: Many who know the truth are afraid to speak. Whistleblowers face retaliation. Journalists risk ridicule. Politicians risk being called conspiracy theorists. So the silence continues.

Section 6: What You Can Do

You are not powerless. Here is what we need from every citizen who reads this:

Listen Without Prejudice

If someone in your life—your friend, your coworker, your family member—tells you they are hearing voices, feeling energy exposure, or being watched in ways they cannot explain, do not rush to call them crazy. Ask questions. Look at the patents. Consider the history. Give them the same benefit of the doubt you would give any other victim of abuse.

Demand Investigation, Not Diagnosis

When these issues come up in your community, demand that authorities respond with technical investigation, not psychiatric dismissal. Ask for spectrum analysis. Ask for environmental measurement. Ask for engineering review. Ask why the police, the FCC, and the medical system have no protocol for handling directed-energy complaints.

Contact Your Representatives

Tell your members of Congress that you want hearings on neuroweapons, neural privacy, and non-consensual human experimentation. Demand legislation that bans the use of

these technologies against American citizens. Demand whistleblower protections for those who expose these programs.

Spread the Documentation

Share this dossier. Share the patents. Share the history. The system's greatest protection is public ignorance. Every person who learns the truth is one less person who will look away.

Protect Your Own Digital and Physical Security

- Use encrypted messaging for sensitive communications.
- Be aware that smart devices, cellular networks, and digital infrastructure may be leveraged for surveillance and targeting.
- Support local efforts to build community awareness and mutual aid networks for those who are targeted.

Section 7: Our Demands

We, the TARGETED.ARMED community, demand the following:

1. **Public Hearings:** Congressional hearings in Judiciary, Intelligence, Armed Services, and Oversight committees to investigate neuroweapons, directed-energy systems, and non-consensual neural surveillance.
2. **Independent Investigation:** A cross-agency Inspector General audit of all programs involving RF bioeffects, neural interfaces, and human-effects testing, with public and classified reports to Congress.
3. **Legislation:** A Neural Privacy and Neuroweapons Prohibition Act that bans the use of RNM, V2K, synthetic telepathy, and directed-energy weapons against U.S. persons; protects neural data under the Fourth Amendment; and prohibits non-consensual human experimentation.
4. **Victim Intake and Protection:** A secure, independent civilian intake system with case identifiers, evidence-preservation rules, privacy controls, and anti-retaliation protections.
5. **Medical Reform:** Standardized clinical protocols for evaluating directed-energy and neurological complaints that do not automatically default to psychiatric diagnosis.
6. **Redress:** A mechanism for affected individuals to access preserved records, obtain independent evaluation, and seek meaningful compensation for harm suffered.

Closing Statement to the American People and the World

We are not your enemy. We are not delusional. We are not a cult. We are citizens who have been subjected to technologies that no free society should tolerate. We have lost jobs, homes, health, relationships, and credibility. But we have not lost our voices.

The question before you is simple: Do you believe that your thoughts belong to you? Do you believe that your body is yours? Do you believe that no government, no agency, no contractor has the right to enter your mind, speak inside your head, or assault you with invisible energy without your consent?

If you believe those things, then you are on our side. Not because you have experienced what we have, but because you understand that a right that is not defended for the few will not exist for the many.

We are TARGETED.ARMY. We are standing in the light. We invite you to stand with us.

Appendix A: Key Patents You Can Look Up Yourself

Table

Patent	What It Describes
US 3,951,134	Remotely monitoring and altering brain waves
US 4,877,027	Hearing system using radio frequency
US 4,858,612	Microwave hearing device
US 6,011,991	Brain-wave communication system
US 5,159,703	Silent subliminal messaging
US 5,507,291	Changing brain states and reading emotions remotely

Patent	What It Describes
US 6,587,729 B2	Radio-frequency hearing effect for speech
US 6,017,302	Acoustic manipulation of the nervous system

All of these are publicly searchable at patents.google.com.

Appendix B: Terms to Know

- **RNM** – Remote Neural Monitoring
- **V2K** – Voice-to-Skull
- **DEW** – Directed Energy Weapon
- **RF** – Radio Frequency
- **Frey Effect** – The scientific name for microwave-induced hearing

Appendix C: Where to Learn More

- **TARGETED.ARMY** – Our community platform for documentation and support.
 - **MaxisRichards.com** – Founder resources and public records.
 - **CIA FOIA Reading Room** – Declassified MKULTRA documents.
 - **Church Committee Reports** – Historical documentation of NSA surveillance abuses.
 - **National Academies Press** – Public report on RF energy effects on U.S. personnel overseas.
-

This dossier reflects the collective knowledge, experience, and urgent request of the TARGETED.ARMY community as of August 2026. We invite every citizen to examine the public record, question official silence, and join us in demanding accountability.
